Terminal Disclaimer

The terminal disclaimer filed on 22 August 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration dates of the full statutory term of the patent granted on U.S. patent 7,224,798 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1 – 19 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to defining a method for providing a plurality of programs in a conditional access system. According to the board decision submitted by BPAI on 31 July 2012 (before *MARC S. HOFF, JAMES R. HUGHES, and GREGORY J. GONSALVES, Administrative Patent Judges and GONSALVES, Administrative Patent Judge* on the record), the specification states that "[a]ny part or all of MPEG-2 transport stream 701 may be encrypted, ..." (SPEC: Page 27 Line 23 – 24 & Figure 7) with the earlier provisional priority date on 1 August 1997 (60/054,575: Page 28 Line 25 – 26 & Figure 7), which provides adequate support for the claimed invention. Thus, the prior arts on record fail to teach or suggest a method for providing a plurality of programs in a conditional access system comprising the steps as claimed.
